OUR TEAM

OUR HISTORY

National Band & Tag Company was founded in 1902 by Joseph Haas of Newport, KY. Much like other pioneers of that period, he opened a small shop in an abandoned barn in Newport, KY.

Haas intended to manufacture poultry leg and wing bands. He knew little about poultry farming, but had been informed that breeders were improving their flocks and it was necessary to use some sort of marker to distinguish one fowl from another. Visualizing the possibilities of a new industry, Haas went to work designing a few patterns of bands. With recommendations from customers and experimental projects, he was able to come up with bands that worked.

By 1914, the business began to grow. To keep up with the increase in business, he moved to a larger garage in Newport, KY. Other animal identification tags were added to the product line, including livestock tags marketed under the Hasco name.

Over the years more property was acquired and today National Band & Tag occupies almost an entire block in Newport, KY.

STATEMENT OF PURPOSE

VISION

We live for the day when...
The spirit of our unbreakable family blesses everyone we reach.

FINISHING OPTIONS

None (Direct From Press)
Tags have mill and die cut edges and are covered in an oil residue. No additional finishing. By request only. *No Charge.*

Dry Tumbled (De-Oiled) (Standard)
Oil residue is removed, but tags may have a sharp edge (die cut edge). Can cause scratches to tag. No Charge on tags with holes. *Special Charge H (see pricing on page 4.)*

Wet Tumbled (Smooth Edges)
Oil residue and sharp edges are both removed, can cause scratches to tag. *Special Charge H (see pricing on page 4.)*

Polished (Premium Finish)
Tags are smooth and shiny. No sharp edges. For Stainless Steel, Brass, or Plain Aluminum. The tags get wet tumbled to try to remove all blemishes. Only available on laser etched or un-numbered stamped tags. *Special Charge H (see pricing on page 4.)*

NUMBERING/STAMPING

Character Size:	Max characters per inch horizontal:	Max characters per inch vertical:
3/64"	24	14
1/16"	14	10
3/32"	12	8
1/8"	10	6
3/16"	8	5
1/4"	7	3
5/16"	4	2
1/2"	2.67	1

All stamped letters are uppercase only. See laser-etching (pg 35) for upper and lowercase text. The tag's size, shape, and hole placement determine the available stamping and numbering area. Only one stamped font (sans serif) is available. Some special characters may be used. Character size can be requested but is not always guaranteed.

HOLES & SLOTS

NOTICE: Hole and Slot images are not to scale, please use dimensions. One or two 1/8" holes centered left and right are standard and included in the price (for industrial tags, see pages 17-20). One 1/8" hole centered top is standard (for dog & cat tags, see pages 6-12). No holes is also available at no additional charge. Additional holes, different locations, sizes, slots incur a minimum \$25 set-up fee. Custom sizes and slot locations available at additional charge. Edge of tag to edge of slot = 3/16".

OTHER TAG OPTIONS

Blank Tags
Most tag styles can be made blank. *STANDARD PRICING.*

Stamped Tags
Stamping letters and sequential numbers are our most common identification method. *STANDARD PRICING.*

Laser Etched Tags
A higher-end solution compared to stamping. We can laser etch linear barcodes, QR codes, 2D data matrix codes, logos, numbers, etc. *CALL FOR QUOTE.*

Paint Filled Stamping
Special Charge E. Stamped characters and logos can be filled with black or white paint to make them easier to read. (See page 4 for pricing)

Stamped Logo (See page 36 for logo submission instructions)
Custom made hardened steel logos are used to stamp an image into the metal tags. There is a one-time charge of \$200-\$500 to make the logo (or more depending on the detail). *CALL FOR QUOTE.*

Backside Stamping (For flat tags)
Tags can be stamped on both sides.
PRICING: Add \$25 set-up charge for Aluminum Tags and \$75 set-up charge for Brass or Stainless Steel

PAW FINDERS

Paw Finders is a rabies tag and lost pet recovery system, all in one tag! The QR Code on the back of the tag can be registered for a one-time fee with the pet owner's contact information. If the pet goes missing, a registered tag will make returning the pet home quick and easy. Paw Finders is only available on select styles, at select times of the year. Paw Finders is a product of National Band & Tag Company. U.S. Patent No. 11,301,736.

Visit www.PawFinders.com for more info.

LASER ETCHING

All laser etching orders are quoted based on quantity, material, and what you want on the tag. With the laser, the customization options are endless! National Band & Tag specializes in laser etching barcodes, logos, sequential and custom numbering, graphics and more. See page 35 for more info.

CUSTOM LASER ETCHED TAGS

LASER ETCHING MAY BE A SOLUTION FOR YOU

We can make anything from Blank Tags to Barcodes to Complex Layouts with Logos. If you can dream it, we can probably make it.

MATERIAL OPTIONS

LAYOUT OPTIONS

COLOR OPTIONS (ALUMINUM ONLY)

TEXT SHADES

All laser etching orders are quoted based on quantity, material, and what you want on the tag. With the laser, the customization options are endless! National Band & Tag specializes in laser etching barcodes, logos, sequential and custom numbering, graphics, and more. \$35.00 Layout Fee

LASER ETCHING INFORMATION

Laser Etching: Available on metal tags only. Material is physically etched with the laser beam into the surface of the material, deep enough that you can feel it with your finger nail. On anodized and colored aluminum the metal will change color from the base color to white, thus providing a high contrast character.

Laser Marking: Available on plastic tags only. The characters are marked onto the surface of the material using an oxidation process which results in a bold contrasting character. The characters are dark gray, almost black in color.

Barcodes & Scanners: Laser etched barcoded tags are designed to perform in a wide variety of conditions and environments. Laser etched barcodes perform differently than printed barcodes because they are physically etched into the surface of the material. It is always best to determine if your scanner will adequately read the tags before and after submitting them to your specific environmental conditions. You can request a sample tag to test with your scanners.

BARCODE GUIDE

Linear Barcode

- 1D Barcode
- Can be scanned with a 1D scanner and most 2D scanners
- Code 39
 - Can encrypt the alphabet, digits 0-9, and special characters: - " . \$ % + - / * "
 - Uses 9 elements per character (5 bars and 4 spaces)
 - Larger in size
 - Great for encoding short serial numbers
- Code 128
 - Can encrypt all 128 ASCII symbols
 - Uses 6 elements per character (3 bars and 3 spaces)
 - More space efficient
 - Great for encoding long strings of information
- Interleaved 2 of 5
 - Can encrypt numeric data
 - Requires of an even number of digits 0-9
 - Must be 2, 4 or 6 digits long (maximum of 6 digits)

2D Data Matrix Barcode

- 2D Barcode
- Can contain up to 2,335 alphanumeric characters
- Great for encoding large amounts of information on a small amount of space
- Most secure barcode available
- Can be read with a smart phone or 2D scanner

QR (Quick Response) Code

- 2D Barcode
- Can contain up to 4,296 alphanumeric characters
- Typically leads to a website
- Can be read with a smart phone or 2D scanner

LOGOS, FONTS & DATA TRANSFER INSTRUCTIONS

Logos: Submit an Adobe Illustrator vector files in either AI, PDF, or EPS file formats. If a only a JPG or PNG are available, please send and we will determine if an artwork conversion fee is needed. (These instructions apply for stamped logos as well).

FonTS: All True-type fonts are available.

Data Transfer: TXT Files are Preferred. Acceptable file types include: TXT, XLS, XLSX. Do not use leading spaces, delimiters, commas or other characters that you do not want to appear on your tags. For multiple tags with the same text, list them as many times as you need them in the Excel file.

BARCODE DENSITY / SHORTENING YOUR URL

Long URLs (ie: many characters) mean you will have a dense barcode, which is more difficult to read, especially with a low-quality imager such as a smart phone app.

To change your link to a less dense barcode, follow these steps:

1. Copy your link
2. Go to <https://bitly.com/>
3. Paste your link in the box at the top right to shorten
4. Copy the new link, paste in your file to replace long link

(Go to www.nationalband.com/barcode-density for more information on shortening your URL).

REPLICA BANDS
Style 1242
Material: Aluminum
Pricing: \$50 for the first band and \$25 for each additional one of the same Certificate. Pricing starts over for each new Certificate. Reward bands and Jack Miner bands cannot be duplicated. Hard metal steel bands can only be duplicated onto aluminum bands.

How it works:
1. You report the band to the USGS Bird Banding Laboratory
2. They send you a Certificate of Appreciation
3. You send a copy of your Certificate to us along with your order
4. We confirm it with the USGS
5. You get bands that look exactly like the one that was on your bird

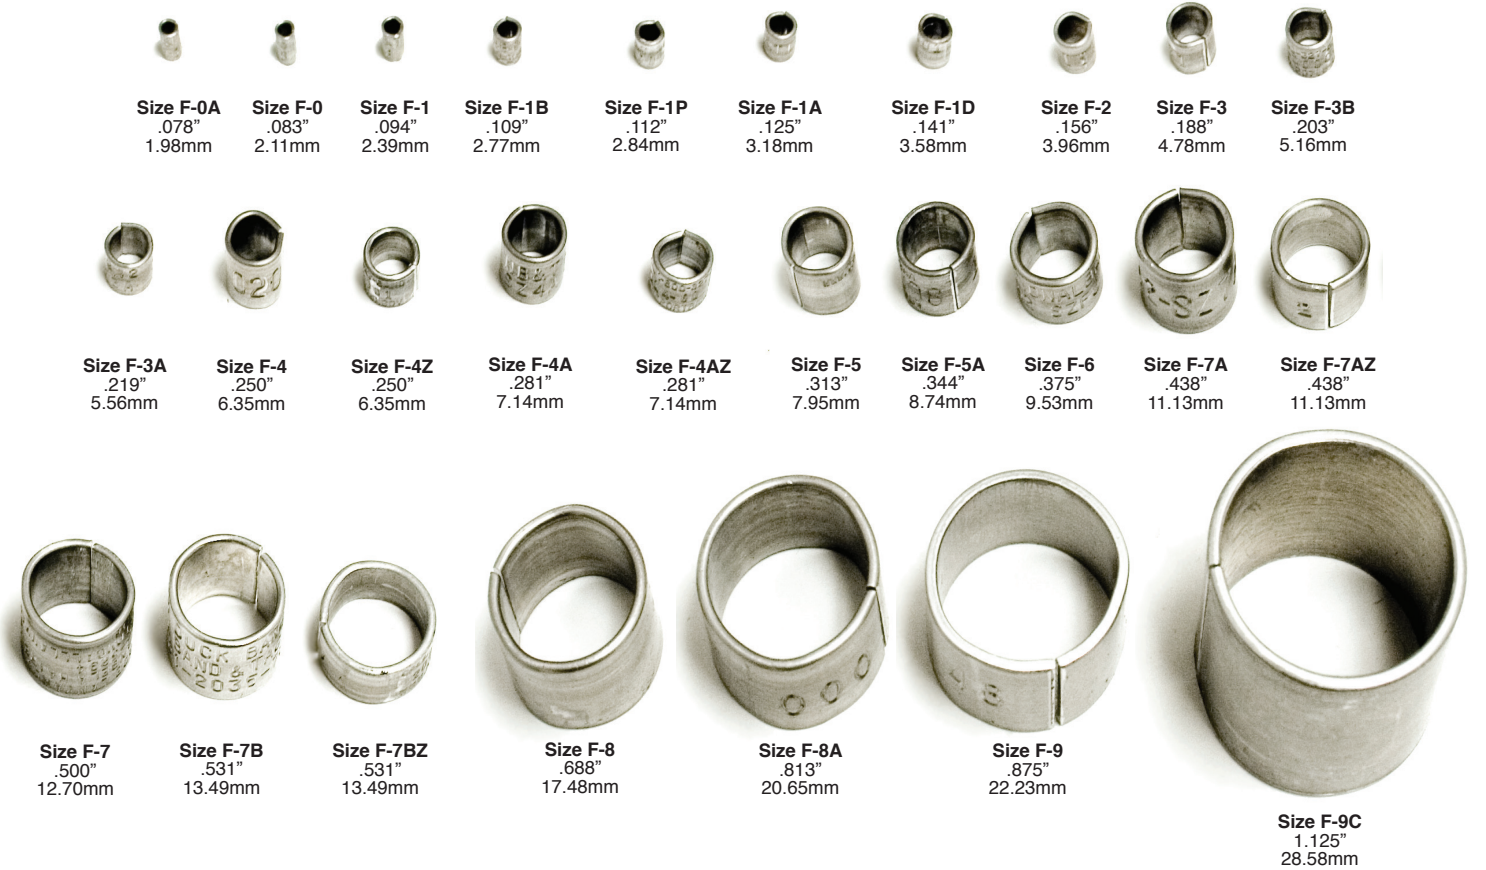

Don't see what you're looking for? Call us! We can probably make it!
